3D puzzle "WORLD MAP L"
Scale: 1/39 mio
Number of details: 31
Size of the assembled model: 830x550 mm
Material: birch plywood

Pack contains:
1. Puzzle parts on ply sheets
2. Adhesive tape

General recommendations:
1. The map should be attached on smooth, degreased and flat surface.
2. You will need: stationery knife, ruler and double-sided adhesive tape.
3. Installation begins from the central part of the map (part №1 Africa). Place Africa in the center of the wall and then attach part №2, №3 and so on.
4. Before you start, make sure the size of your wall is bigger than the map.
5. Very carefully squeeze out the details from the obverse side of the board, trying not to break them.
6. The adhesive tape should be glued to the back side of the parts. For better adhesive strength you should fill at least 50% of their surface. Don't use adhesive tape on the edge of the parts not to impede the process of mounting. Cut off the leftovers of the tape with a stationery knife.
7. Cut off the jumpers with a stationery knife on the parts that are adjoined to each other.
