THE MODEL-INDEX

The system with the stars

In order to make the selection of model kits easy even for inexperienced modellers, we have a system in this catalog that represents the level of experience of the modeler or the model operator in general terms. Of course, this system can only be a rough guide and therefore cannot guarantee success.

Please also note that the stars only show the level of experience in the respective model discipline, which means, for example, that an expert in ship model making cannot start with an expert aircraft model.

Following the individual steps with explanation:

Simple kit, no experience required

Simple, no basic knowledge, but some skill and crafting experience recommended.

Not a first model. Minor experience in the respective model discipline is required.

General experience in the respective model discipline is required. The construction manual is not based on basic knowledge.

Only for experts. Well-founded knowledge in the respective model discipline is absolutely essential. The construction manual is not based on basic knowledge.

All articles in this catalog as well as accessories, spare parts and materials are available through the model trade and on the Internet at www.krickshop.de

The new brand in the **krick** range

With the closure of Robbe-Modellsport, Germany, we decided not to let die the interesting and timeless ship model designs from Robbe, but continue to produce in our facility, to integrate into our ship model range and to adapt to modern manufacturing methods. We will continue to revive these ship model designs and the large range of accessories under the brand RO-marin in future.

RO-marin ship models are characterized by a high degree of prefabrication of the ABS hulls and other plastic parts. The fittings made of plastic and metal are legendary and thus represent an excellent addition to our previous rather classically oriented kit range.

In addition to the outstanding shapes of these ship models, we now have the opportunity to combine them with our very accurate laser cutting and laser engraving technology. It is our aim to produce the previous models even more faithfully and in finer detail, so that they meet the current demands of a ship model. On and on we go deeper into the design, changing and enhancing the detail of the RO-marin kits, without losing the charm of these designs.

Like the entire Krick model assortment, the RO-marin range is constantly being expanded and growing piece by piece. Therefore, this catalog can never be up to date and complete. For this reason, we are always expanding our websites. On www.krick-modell.de you can find almost daily new items. Use this option for even more accurate and up-to-date information. You will also find information about our catalogs on the rear page. We are happy if you also use these.

SEA-JET EVOLUTION RAPID WATER SPORTS FOR BRUSHLESS E-DRIVE

After many successful years of the robbe Sea-Jet, the Sea-Jet Evolution has become established in the Sea-Jet Cup competitions worldwide with higher performance and modern look. Based on the modern race jets of the competition classes, the visual appearance is much sleeker than that of its predecessor. To improve its lateral stability, the hull wider, and lowered in height. The Evolution can be constructed as a dual brushless motor drive, This ensures high speed. But even with a cheaper brush motor variant it is really fun and of course can be easily updated later to a high performance brushless motor configuration. As the propellers are now direct drive (no gear box as the previous version) Changes can be made without adjusting the prop shaft. A centrally located rudder and optimized hull shape guarantee high maneuverability and driving pleasure.

ro1266 kit Sea-Jet Evolution

Made in Germany

Kit Contents

- Hull, deck and seat made of vacuum formed, black ABS plastic
- Rubber profile as edge protection
- Laser cut parts for drive and RC installation
- Multipart driver figure made of plastic
- Handlebar and mirror made of molded plastic parts
- Shafts Ø 4 mm with stern tubes (2x)
- Propellers (left and right handed)
- Wedge rudder with bracket
- Small accessories for assembly
- Multi-coloured decal sheet
- Multilingual construction manual
- Boat stand

Optional drive sets

- ro1268 Brushless drive set with 2 ROXXY BL Inrunner motors 2845/07, couplings and cooling coils
- or
- ro1267 Standard brushed drive set with 2 brush motors, suppression kit, matching couplings and cooling coils

Optional accessories for Radio Control

- 67072 Speed control Seaking 60A (2 pieces) with brushless drive
- 67052 Cruise control Quicrun 860 Dual with brushed drive
- 79054 rudder servo
- Remote control from 2-channel

KATJA MOTORYACHT CONSTRUCTION KIT

Katja is the successful replica of an elegant, four-seat sport boat with inboard engine. The model essentially consists of seven plastic parts. Deck and cabin are made in one piece from transparent plastic. Thus eliminates the costly cutting and pasting of the windows. The Katja can be used as a free-running model or radio controlled. At free run, the rudder is set to a fixed radius. Equipped with a radio control, the Katja is extremely agile and due to the electric motor very nimble. We recommend the Katja as the ideal fun model for the beginner.

Kit Contents

- Hull, deck, cabin insert, seat back dashboard made of white colored or transparent plastic
- Complete stern tube with coupling and three-blade propeller
- Rudder with rudder lever and steering linkage
- Decals, masks for windows
- All fittings such as cleats, steering wheel, flag and horns
- Detailed construction manual and construction drawings

Optional accessories for operation with remote control

Order no.

- 42235 MAX Speed 400 electric motor
- 42128 Suppressor kit for electric motors
- 67051 Electronic speed controller
- 79050 Standard servo for rudder function
- 667240 drive battery 7.2 V 3000 mAh
- roF2201 2-channel remote control
- Motor connection cable and plug

Optional accessories for operation without remote control

NAJADE MODEL OF A LUXURY-MOTORYACHT IN SCALE 1:15

The Najade is a spacious motor yacht, as found in many Mediterranean ports. Like its prototype, the Najade has a large and spacious cabin, a mighty flybridge and a shapely stern with a swim platform. The hull tolerates a powerful motor for fast ride. This is done, for example, by the BL motor ROXXY 3656-06, which directly drives the ship's propeller via the prop shaft. The drive is not included in the kit, so that the model builder is given the freedom for his own drive concept. In order to make the construction of this impressive model progress rapidly, e.g. the glazing formed of transparent material. Together with the included fittings kit and the large decal sheet, this results in a perfect finish for the Najade.

**RC-
Model**

Kit Contents

- Thermoformed plastic hull
 - Thermoformed plastic deck and body parts
 - Transparent, deep-drawn glazing
 - Laser cut plastic parts for RC installation
 - Stern tube with shaft and propeller
 - Accessories for engine and RC installation
 - Double steering gear
 - Complete fittings kit
 - Decal sheet
 - Multilingual, illustrated construction manual
 - Boat stand
- Paint and adhesives are not included

Optional accessories

Drive standard version

- 42260 Motor Max Speed 800
- 42123 Water cooling coil
- 67052 Speed Controller WP860 Dual

Optional accessories

Drive brushless version

- ro4786 BL motor ROXXY 3656-06

SAN DIEGO SEMI SCALE MODEL OF A MEGA-YACHT 1:25

NEW

With its sleek design, the San Diego delivers a fantastic ride that is in no way inferior to its original. The large hull length of 1.27 m and the slim design make for a great and faithful appearance on the water, which reflects the elegance of such luxury yachts. Equipped with two powerful electric motors (frame sizes 700 to 800) that drive two counter-rotating surface ship propellers directly, the San Diego starts to plane contact after a short acceleration phase. Pivoting Navy Speed drives on the one hand allow a very good directional stability, on the other hand a high maneuverability even with moving water. With the fitting kit, the luxurious features of the original boat can be completely replicated in the model.

delivery

- Hull and deck deep drawn from plastic, with moulded spray rails.
- 2 Navy Speed direct drives
- 2 Navy 44 universal joint couplings
- 2 stern tubes with shafts
- Rubbing strips, high coaming
- Superstructure can be removed in one piece, individual parts of the superstructure are made of transparent plastic
- Laser cut plastic parts for interior fitting and fly bridge
- RC parts, decals
- Detailed construction manual

Length about 1270 mm
Width about 250 mm
Height about 370 mm
Total displacement about 5000 g

- ro1500 Life raft
- ro1302 Radar head
- ro1300 Radar
- ro1353 Ship bell
- ro1401 Windlass
- ro1362 Flag USA 2 pcs.

DOLLY HARBOR BARGE

This type of ship is used universally in many ports around the world. Depending on the design, these barges are used to transport people or materials, but can also be used with special equipment to tow ships or as fire boats. With an electric motor fitted and the single-screw drive, the Dolly can be driven true to the original. The very good maneuverability results from the tunnel formed in the hull. The model can be equipped with a special function set as a fire boat with extinguishing cannon, water pump, etc. Another possibility is the construction of a towing harness for use as a small harbor tug.

The Dolly is easy to build, but is a great basis for many modelers to customise with their own ideas because of its universal use.

Kit Contents

The kit contains the preformed hull, the preformed wheelhouse made of transparent material (this does not require cutting out of the windows) and other superstructures and fittings as well as the deck cut out with laser. The complete steering gear, stern tube with prop shaft, propeller and coupling. Self-adhesive decals, multilingual construction manual and drawings.

The fittings kit contains working lights and all fittings such as ventilators, bollards and much more.

PAULA REMOTE CONTROL MODEL OF A WORKING BOAT WITH CRANE IN SCALE 1:25

In many ports of the world you can meet the originals of our Paula. They eagerly leave the harbor to serve in the coastal area, at the mouths of the great rivers and at the entrances to the ports. They are agile for their size and as very manouverable work boats are universally used. Tasks include the collection and disembarkation of nautical symbols, the elimination of small obstacles in the shipping channels or the transport of specialized marine research equipment. Thus result a big variety of uses for this boat for the resourceful modeller. The Paula is the ideal model for the beginner and advanced, who still wants to do real model making. The recommended lead-acid battery can be used for long periods of use. The overhead crane can deposit and pick up loads across the rear of the model.

RC-Model

Made in Germany

Kit Contents

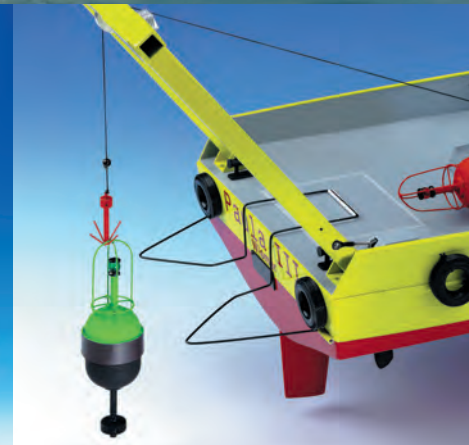

- ABS hull and deck vacuum formed
- Laser cut superstructure including windows of transparent material and window frames
- Laser cut components for the interior of the hull
- Complete steering gear
- Stern tube with shaft and propeller
- Shaft coupling
- All parts for the crane
- Decal sheet
- Construction manual with drawings
- Complete fittings kit

NEPTUN THE TUG BOAT

The Tug Boat Neptun is a remote controlled model of a tug boat in 1:50 scale as they are still found in many ports. Model of this construction were harbour tugs of the Bugsier series in Hamburg. In the construction of the model much emphasis was placed on true to scale and lovingly executed details. On the lower mast platform is a functioning, rigid fire extinguisher. The Neptune is particularly manoeuvrable thanks to the swivelling Kort nozzle, so that all difficult towing and manoeuvring operations are easily executed. The towing hook can also be opened by remote control. The separate fittings kit contains all of the components for detailed fitting of the model, e.g. Anchor, windlass, bollard, life raft, illuminated top and position lights, towing winch, tire fender and many other small parts.

Made in Germany

Kit Contents

- Hull, bulwark, machine and wheelhouse of vacuum formed ABS plastic
- Fire monitor and other plastic hardware
- Laser cut wood parts for interior work
- Prop shaft, propeller
- Injection moulded Kort nozzle, functional towing gear and stanchions
- RC connection parts, small accessories for construction.
- Detailed fully illustrated construction manual, detailed drawings

Propulsion accessories

- ro1031 Fittings kit Neptun
- 42275 Electric Motor MAX Gear 2.5: 1
- 42128 Set of suppression capacitors
- 67051 Speed Controller WP1060
 - Battery 6 - 7.4 volts
 - Remote control from 2-channel
- 65150 Electric pump for fire monitor

Scale 1:50
Length 570 mm
Width 175 mm
Total displacement 2500 g

Antje Crabbing or Fishing Cutter

NEW RC-Model

ANTJE EXEMPLARY MODELL OF A CUTTER IN 1:25 SCALE

Of the smaller workboats on the North and Baltic Seas, cutters are the most popular for crabbing, fishing and many other jobs. Their characteristic appearance makes them extremely popular with model builders. The prefabrication of the individual components simplifies and accelerates the construction of the model.

The spacious hull offers ample space for a large battery, the drive motor and the remote control system. For detailed design, there is the fitting set no. ro1111. Especially the true to original and beautiful hull form of the Antje has motivated us to reissue this pretty model, but we also wanted to improve a lot of detail and make it true to the original. The laser technology helps us a lot to ensure more detail and make the construction easier. Thus, the new kit receives a complete laser-engraved wooden deck. Likewise the superstructures are composed of two layers of lasered plywood and some details for the interior have been added.

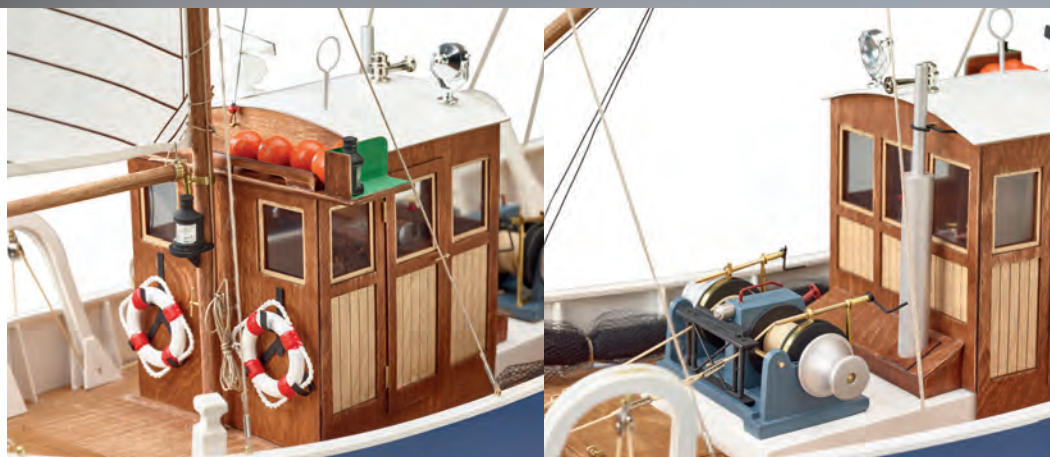

Made in Germany

Kit Contents

- Hull and deck made of vacuum formed ABS plastic
- Deck planking made of laser-engraved ply
- Wheelhouse and companionway made of laser cut plywood
- Masts and yards
- Steering system and linkage
- Ship propeller, shaft
- RC connectors
- Multilingual, illustrated instructions and drawings
- Boat stand

Fireboat Düsseldorf

DÜSSELDORF SCALE MODEL OF THE FIRE FIGHTING BOAT DÜSSELDORF 1:25

The fire-fighting boat Düsseldorf was developed and built by Rheinwerft GmbH & Co., Mainz-Mombach for use in the Ruhr area of Germany. Equipped for disaster situations, be it a ship that has caught fire, spilled oil or a potentially explosive harbour installation, it can throw water or foam at 10.5 bar up to 95 m wide and 45 m high with its fire suppression monitors. The two 12-cylinder V-engines with a total of 930 kW (1260 hp) give the boat a top speed of about 37 km / h. The RO-marin construction kit of the fire fighting boat "Dusseldorf" is ideally suited in size and equipment, to showcase the diverse application possibilities of the original boat in the model. The fire monitors, the crane, the windlass, the radar, the searchlights, the blue light, the horn and the siren as well as the diesel sound can all be fully functional.

Kit Contents

- Vacuum formed hull, body and other components made of plastic
- Laser cut plastic decks and small parts
- Laser cut plywood parts, e.g. Motor frame and pump plate
- 3 working fire monitors
- Movable boat crane
- 3 propellers and 4 rudder sets as well as connection parts necessary for RC installation
- Spray paint window masking
- Decal sheet
- Detailed building instructions and plans

ro1100 Construction kit fire boat
Düsseldorf

RC- Model

The thick-walled plastic hull is large enough to accommodate the numerous units for all special functions. Two proven Max Gear motors give the model a reasonably high speed. Four large rudders guarantee extreme manoeuvrability for forward and reverse travel. The fire monitors can be swivelled horizontally and vertically via the remote control. They can spray far with the recommended electric gear pump. With the boat crane, the deep-drawn rowing boat can be lifted true to size and lowered outboard.

The kit contains the preformed hull, the preformed wheelhouse made of transparent material (which does not require cutting out of the windows) and other laser-cut internals. Complete with steering gear, stern tube with prop shaft and propellers. Self-adhesive images and cover masks. Multilingual construction manual with detailed plans.

HAPPY HUNTER SALVAGE TUG

The Happy Hunter is the detailed replica of a Dutch offshore and Salvage vessel. The model is driven directly, without gear reduction, by two low-speed Max Power 700 high-torque electric motors on two high-performance propellers. Fixed Kort nozzles are used to increase the thrust.

Even the most difficult towing and manoeuvring can be performed in conjunction with the optionally available bow thruster. The spacious plastic hull allows the installation of numerous special functions. Experienced modellers will equip the Happy Hunter with working lights, radar, windlass, sound and towing equipment. Also the fully functional working of the crane is possible.

**RC-

Sailing Yacht Comtesse **NEW**

COMTESSE SAILING YACHT

The Comtesse is the image of a typical sailing yacht of the 70s and 80s. These rugged, mostly GRP boats still make up the classic image of marinas across Europe. There are numerous models from diverse shipyards and on the basis of this shapely hull many original yachts can certainly be modelled and equipped with numerous individual details.

At the same time, this shapely yacht offers very good sailing characteristics for the demanding sailor and is ideal for a relaxed afternoon at the lake. Thanks to its streamlined hull with moulded keel fin, the elegant Comtesse achieves remarkable speeds in light wind conditions. But even with stronger breezes can be easily sailed, as it is a capsizesafe keel boat. With its simple design and balanced handling, it will make it much easier for newcomers to model sailing. With Comtesse, of course, all courses, from "cruising" against the wind to sailing "in front of the wind", can be sailed effortlessly using the rudder and the sail adjustment, so that any point can be controlled and then sailed back to the starting point.

The fittings set contains many visible fittings such as lamps, wheel and parts for the steering column, winches, stanchions and more. The pictured wing keel is an optional part that significantly improves the sailing characteristics and righting moment of the Comtesse. This keel is also a good option for many other sailboats.

Kit Contents

- One-piece ABS hull (no bonding of the hull and deck required) with integral keel fin
- Deep drawn cockpit and sliding hatch
- Lasered frames and parts for interior work as well as sliding hatch and boat stand
- Ready-to-install plastic rudder with shaft
- Ready-cut sail, one-piece aluminum mast, aluminum booms
- All fittings for the sail
- Detailed construction manual

Order no. ro1468

NAVY KARDAN 44

Shaft offset compensation approx. 2 mm. For shafts with 4 mm and 3 to 3.2 mm Ø (with reducer)
Total length with center piece 54 mm, without center piece 38 mm

Order no. ro1449

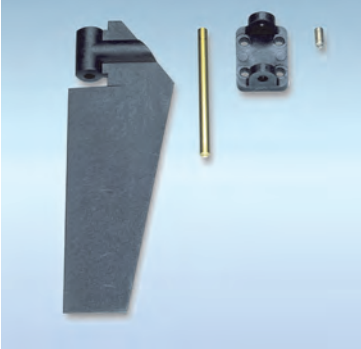

NAVY KARDAN 35

The classic plastic cross joint with brass inserts, metal center piece and stainless steel grub screws.
For shafts with 4 mm and 3 to 3.2 mm Ø (with reducer) total length 38 mm

Order no. ro1596

KEEL RUDDER

Keel Rudder
For Off Shore boats
Rudder blade length 86 mm
Order no. ro1477

KEEL RUDDER PIVOTING

For racing boats. When touched by obstacles, the rudder blade automatically swings up.
Total height about 65 mm
Order no. ro1490

ÖILER FOR STERN TUBES

These handy oil fillers can easily be placed around your stern tube and tightened. Then you drill the filling hole through the oiler into the stern tube. Now a piece of silicone tubing can be attached to fill in oil or grease.

Order no.
65250 oiler for 6 mm stern tube
65252 oiler for 8 mm stern tube

NAVY-DIRECT COUPLINGS

Precise rigid couplings for connecting different shaft diameters, made of aluminum, with grub screws. Outside Dia. 11 x 17 mm

Order no.	Dia.	to	Dia.
ro1447	3,17mm		4,0 mm
ro1748	4,0 mm		4,0 mm
ro1450	5,0 mm		4,0 mm

COUPLING HOSE

Connects shafts from 1.5 to 3.0 mm in diameter. Flexible, robust, smooth running. Length 50 mm

Order no.
ro1386 pack of 10 pcs.

ELASTIC-COUPLING

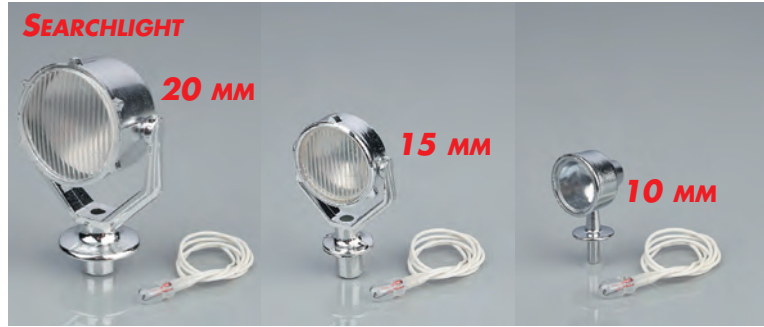

For shaft connections from 4 or 3.2 mm to 3 or 4 mm (with reducer). Smooth running due to strong rubber compound. With stainless steel grub screws. Total length 28 mm

Order no. ro1445

HEAVY DUTY COUPLING

With toothed rubber damping for high power transmission
Available in 2 versions
Order no.
ro1446 or shaft connections 5 or 4 mm on 4 or 3.2 mm (with reducers)
ro1436 for shaft connections 5 to 5 mm (not shown)

FIRE MONITOR 1:25

Model replica of a fire monitor, horizontally and vertically swiveling. Can be made functional. Easy assembly due to red-colored molded parts and metal pipes. Can be used on many models.

Order no. ro1562 Fire Monitor 1:25

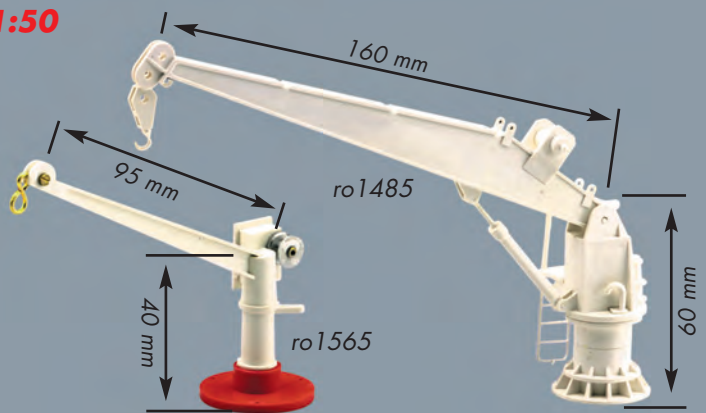

CONTROL DISC SET

Serves for the proportional pivoting of cranes, fire monitors, guns, etc. The gear ratio (3:1) increases the swing range of a normal servo from 90 to 270°. The large disc with a diameter of 60 mm is fixed on the servo, the small disc on the object to be rotated. Very simple installation, also later.

Order no. ro1560 Control Disc Set

CRANE 1:25 & CRANE 1:50

Crane 1:25 - The original-like crane consists of three molded plastic parts. It can be mounted without great construction effort, can be swiveled horizontally and has a crane hook that can be raised and lowered.

Order no. ro1565

Ship Crane 1:50 - Suitable for tugs and similar models. Finely detailed, true to the original design. Movable horizontally and vertically, crane hooks can be moved up and down. Consisting of 13 plastic molded parts and mounting accessories. A decoration set is included.

Order no. ro1485

TOWING GEAR

Functional towing gear made of plastic. The towing hook can be opened with a servo. All pictured parts included.

Width about 77 mm
Length about 50 mm
Height about 30 mm

Order no. ro1434

WATER PUMP

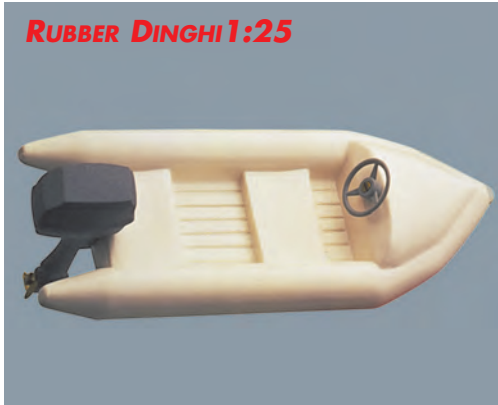

Order no. 65150 Water Pump 6 - 12 V
o.Abb. 70917 Silicone tube
3,5 x 5,5 x 1000 mm

RUBBER DINGHI 1:50

Cast from resin
Length about 98 mm
Order no. ro1489

RUBBER DINGHI 1:25

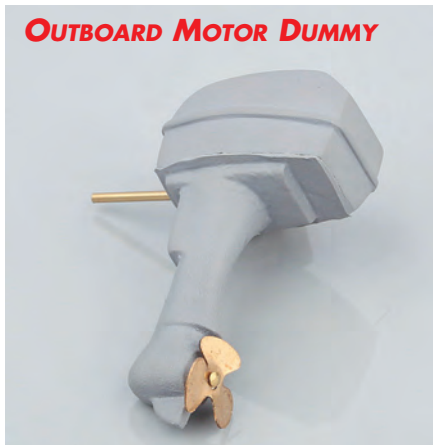

Blown from ABS, buoyant, with outboard motor and steering wheel, length 140 mm
Order no. ro1577

LIFERAFT/LIFEJACKETS

Liferaft
Orange colored, can be found on any ship in different sizes. Dimensions 17 x 37 mm
Order no. ro1501 pack of 2 pcs.
Lifejackets colored yellow for yachts
Order no.

RUBBER BELLOW

Rubber Bellow for water tight linkages on boats
Length 50 mm
Super soft, made in Germany

Order no. ro1400 Pack 2 pcs.

TRIM FLAP SET

Trim Flap Set
For racing boats, adjustable with Right / left-hand thread and lock nut
Size of the sheet 32 x 23 mm
Order no. ro1352

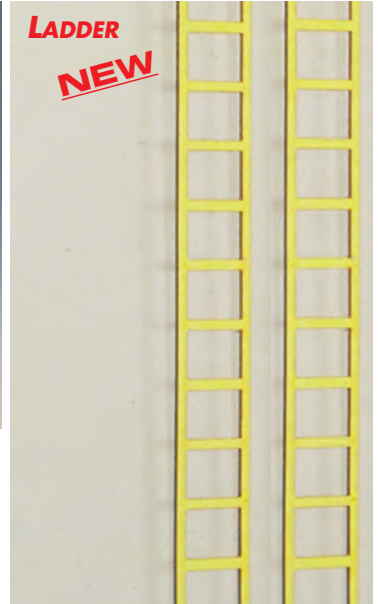

COMPANIONWAYS

made of grey plastic
Order no. width height Pack
ro1328 20 mm 80 mm 4 pcs.
ro1327 15 mm 80 mm 4 pcs.

LADDER

NEW

Brass ladder, ideal for soldering, width 9 mm, step distance 6 mm, length approx. 250 mm
Order no. ro 1425 Pack 2 pcs.

SHIP'S BELL

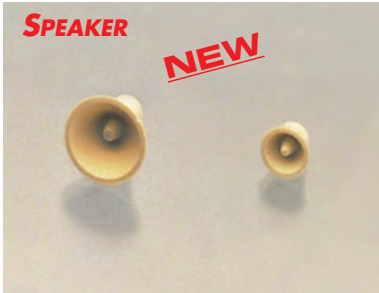

NEW

Turned of brass, diameter 14 mm
Order no. ro 1353 Pack 2 pcs.

SPEAKER

NEW

Made of plastic, 5 mm and 13 mm diameter, each 2 pieces
Order no. ro1304

WINDLASS 1:50

NEW

As used on model Happy Hunter, suitable for many models.
Made of resin, rotary and laser parts.
Dimensions 58 x 38 x 25 mm, scale 1:50

Order no. ro1354

STANCHIONS FLAT

NEW

True to the original flat design, made of brass, ideal for soldering or gluing.

Order no.	Length	Qty.	Holes
ro1313	15 mm	1	
ro1314	40 mm	2	wide
ro1315	40 mm	3	
ro1316	40 mm	2	tight
ro1317	60 mm	4	

MANHOLE COVER

Movable, suitable for e.g. concealed mounting of On/Off switch, Dia. 29 mm
Order no. Pack
ro1518 manhole cover 2 pcs.

DYNAMIC PROPELLER

NEW

2-blade surface propellers used as a pair at Sea Jet Evolution.
Diameter 33 mm, thread M4

Order no. direction of rotation
ro1497 right
ro1498 left

RUBBER PROFILE

NEW

Half-round rubber profile for Sea Jet and other models as sheer rail for plugging or gluing.
Length about 300 cm
Order no. ro10664000

DRIVER FIGURE

NEW

Multi-part driver's doll made of ABS plastic, unpainted white, not glued,
Scale about 1:4, used on model Sea Jet Evolution
Order no. 10661000

WING KEEL

NEW

For improving the sailing characteristics and righting moment of sailing yachts like the Comtesse.

Cast metal, weight about 850 g,
Measures about 80 x 140 x 20 mm

Order no. ro1071 pack 1 pc.

CARBINE HOOKS

NEW

For simple rigging of sheet on sailboats, length 12 mm, load about 15 kg

Bestell-Nr. ro1759 pack 8 pcs.

ALU-PROFILE MAST
9x19x1800 MM

Drawn aluminum mast profile with groove, for larger ship models from 1 m in length

Order no. ro1079

ALU MAST AND BOOM PROFILE
8x12x1000 MM

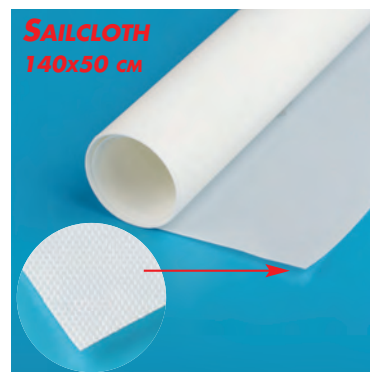

Suitable as a mast profile for smaller models and as a boom profile for fore and main sail.

Order no. ro1116

ALU-PROFILE MAST
ROUND 11 MM

Order no.
ro1526 Profilmast 1000 mm long
ro1527 Profilmast 1620 mm long

SAILCLOTH
140x50 CM

High quality polyester cloth 127 g/m², light and stiff, without structure suitable for classic and modern sailboats. The format 140 x 50 cm is chosen so that it is sufficient for most models for main and fore sail.

Order no. 61905

RIGGING WIRE
STAINLESS STEEL

Highly flexible stainless steel wire for shrouds and stays

Order no.
ro1758 Rigging wire 0,5mm, 10 m
ro1321 Rigging wire 0,8mm, 10 m

CRIMP SLEEVES

For looping at the end of steel wire shrouds and stays Pack 20 pcs.

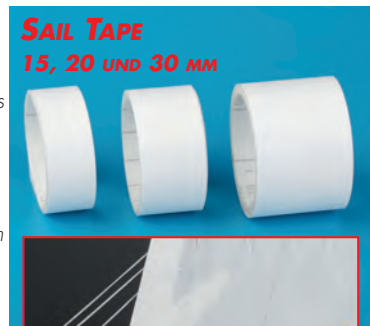

Order no.
ro1318 Crimp sleeves
1,4mm f. wire 0,5 mm
ro1319 Crimp sleeves
2,0mm f. wire 0,8 mm

MOUNTING BRACKET

Made of aluminum for attaching to masts and booms with 2 screws. The second end with free bore can be angled angular or vertically, be used to attach a leash, shroud or stay. Dimension 5 x 25 mm, holes 2 mm

Order no. ro1357 Pk.10 pcs.

SAIL TAPE
15, 20 UND 30 MM

Self-adhesive fabric tape for reinforcing or edging sails in three different widths

Order no. Pack 2 pcs.
61907 1,5 x 136 cm
61908 2,0 x 136 cm
61909 3,0 x 136 cm

ROTATING SWIVEL

With ball bearing for easy and free rotation of ropes with high tensile strength Diameter 6 mm, with two rings each

Order no. ro1320 Pack 2 pcs.

LINE TENSIONER

For adjusting and tensioning plastic lines on model sailboats Suitable for lines of 0.6 mm, Dimension 5 x 15 mm

Order no. ro1325 Pack 10 pcs.

S-HOOKS

Tackle hooks in S-shape made of 1.5 mm brass wire. Length approx. 12 mm

Order no. ro1326 Pack 10 pcs.

YARN OR SHEET ROPE, WHITE

For sheets of model sailing boats, water-resistant and UV-resistant. High strength at low elongation, excellent abrasion resistance.

Order no.
ro1686 0,6 mm (length 10 m)
ro1687 1,0 mm (length 10 m)

SCREW HOOKS

M2,5 x 30 mm with nuts and washers

Order no. ro6955 Pack 5 pcs.

HATCH LOCK (SHUTTER BARS)

Inconspicuous locking device for removable shutters and ship deck parts. Clear plastic, 5 x 8 mm, with screws

Order no. ro1545 Pack 10 pcs.

SHROUD TENSIONER

Turnbuckle with swivel, eye bolts at top and bottom, clevis and nut. For easy adjustment of the shroud or stay length. Thread M3, total length approx. 70 mm

Order no. ro 6088 Pack 2 pcs.
